FOR HAIR REGROWTH

CAPIXAN is a unique anti-hair loss combination. The main ingredient of Capixan is Capixyl™. This is a combination of two ingredients: **Biochanin A** and **Acetyl tetrapeptide-3**.

Biochanin A extracted from Red clover is an effective inhibitor of 5α-reductase (type I and II) activity, thus modulating the conversion of testosterone to DHT in androgenic alopecia.

Acetyl tetrapeptide-3 is a 4 amino acids biomimetic peptide derived from a signal peptide which stimulates tissue remodeling. The peptide has a direct effect on hair follicle. The remodeling signal will increase the size of hair follicle for better hair anchoring and vitality.
